800kg Walk Behind Road Roller

T-REX308D

T-REX308 is a walk-behind double-drum vibratory road roller in operating weight of 0.8t, featuring electromagnetic vibrating, valve-controlled hydraulic steering, and high operating comfort. It's mainly applicable for the compacting of asphalt concrete layers and the compacting of medium and small base and sub-base layers and filler materials and especially suitable for the ground compacting of small projects, including urban roads and gymnasiums. It incorporates excellent curb compacting performance and plays an extraordinary superiority in the compacting operations of narrow working sites and groove foundations

Specs

Machine Specs	
Walk speed	0-4km/h
Operating weight	800kg
Climbing capacity	30%
Drive type	Hydraulic Type
Vibration control	Electromagnetic Clutch
Static linear load	75N/mm
Nominal amplitude	0.5mm
Vibration frequency	70Hz
Exciting Force	20kN
Water Tank	26L
Hydraulic oil	20L
Engine	Changfa CF186
Power	9HP
Starting mode	Hand & Electric

Steel wheel size	x2 ?350 x 630mm
Dimensions	1290 x 680 x 1730mm
