101mm Wood Chipper

RWC1007

The Revaro RWC100 Wood Chipper is a compact yet powerful solution designed for efficient processing of branches, brush, and garden waste. With a 100 mm chipping capacity, this machine is ideal for landscaping, smallholdings, estates, and general property maintenance where reliability and performance are essential.

Powered by a dependable 7 HP engine, the RWC100 features a twin blade drum system with reversible hardened steel blades, delivering consistent, high-quality chipping while extending blade life. The dual V-belt drive system ensures smooth power transfer and protects the engine under load, while the direct drive clutch provides responsive and efficient operation.

Designed with practicality in mind, the RWC100 includes a wide feed hopper for easy material intake and a high discharge chute for convenient output handling. Its compact footprint, durable construction, and optional features such as a tow bar and 360° discharge chute make it a versatile and user-friendly machine for a wide range of applications.

Built for performance and ease of use, the Revaro RWC100 delivers dependable chipping power in a compact, efficient package.

Specs
